**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Kawakami (5,458,018). Kawakami discloses a housing for a bicycle shifter comprising a housing element (2a), an installation opening (see fig. 3), and a closure member (21) for covering the installation opening, the closure member integral with the housing element, wherein the closure member has a substantially planar configuration in the manner of one of a flat surface and a three-dimensional surface. The closure member (21) has a substantially constant thickness over substantially the entire surface of the closure member and is made of a material having hard rubber mechanical properties. The closure member also has a catch element that is brought into latching engagement with a housing recess (see col. 2, lines 60-65), wherein the closure member exerts a slight surface pressure on the housing in the region of the installation opening. The closure member further comprises a recess and a projection for opening the closure member. The housing comprises a second housing element (23) joinable to the closure device by a detachable insertion device.
